

# Landsort Deep, Sopot Control Unit Specifications

2023-11-09 Albertas Mickėnas [albertas@technarium.lt](mailto:albertas@technarium.lt)

Control unit is implemented in 250x200x150mm metal IP67 enclosure.

## Safety features

- Electrical circuit breaker at 6A.
- Earth connection to the metal enclosure.

# Inputs and outputs

Inputs and outputs are implemented as cable glands at the bottom of the enclosure.

Name	In/Out	Specifications
Power input	In	Single phase + earth ~240V, 350W max
Light power	Out	~240V, 320W max
Light DMX control	Out	
Ethernet	In/Out	Optional hole pre-drilled and glued shut, cable gland provided

Cable diameter: 5mm to 10mm.

# WiFi connectivity

Directional antenna is mounted on the side of enclosure. Enclosure has to be positioned so that WiFi antenna is oriented to the closest WiFi hot spot.

# Mounting holes

4 mounting holes are provided at the back of enclosure. Distances: 160x210mm.
